

① □にあてはまる数を書きましょう。

$1 \text{ m} = \boxed{100} \text{ cm}$

$1 \text{ km} = \boxed{1000} \text{ m}$

$2 \text{ m} = \boxed{\phantom{000}} \text{ cm}$

$3 \text{ km} = \boxed{\phantom{000}} \text{ m}$

$5 \text{ m} = \boxed{\phantom{000}} \text{ cm}$

$6 \text{ km} = \boxed{\phantom{000}} \text{ m}$

$100 \text{ cm} = \boxed{\phantom{00}} \text{ m}$

$1000 \text{ m} = \boxed{\phantom{00}} \text{ km}$

$400 \text{ cm} = \boxed{\phantom{00}} \text{ m}$

$3000 \text{ m} = \boxed{\phantom{00}} \text{ km}$

② 計算をしましょう。

$300\text{m} + 700\text{m} = \boxed{\phantom{000}} \text{ m}$

$300\text{m} + 700\text{m} = \boxed{\phantom{00}} \text{ km}$

$500\text{m} + 700\text{m} = \boxed{\phantom{000}} \text{ m}$

$500\text{m} + 700\text{m} = \boxed{\phantom{00}} \text{ km} \quad \boxed{\phantom{000}} \text{ m}$

$1 \text{ km} - 200\text{m} = \boxed{\phantom{000}} \text{ m}$

$1 \text{ km } 300\text{m} - 800\text{m} = \boxed{\phantom{000}} \text{ m}$
